Responsibilities & Context

We are seeking a detail-oriented and analytical **Junior Pricing and Forecasting Officer** to support our pricing and demand forecasting activities within the B2B pharmaceutical sector. This entry-level role is ideal for candidates looking to build a strong foundation in pricing strategy, data analysis, and forecasting while working closely with cross-functional teams. You will assist in maintaining competitive pricing, monitoring performance, and ensuring accurate demand forecasts to support business growth.

Key Responsibilities

- Assist in developing and maintaining pricing models based on market data, cost structures, and competitor insights
- Support regular price reviews to ensure alignment with market conditions and profitability targets
- Collaborate with sales and marketing teams to help prepare pricing proposals for clients
- Analyze historical sales data to support demand forecasting and trend analysis
- Track forecasting accuracy and assist in updating models to improve reliability
- Monitor product margins and report variances to senior team members
- Support initiatives aimed at improving profitability through pricing and cost analysis
- Prepare pricing and forecasting reports, including KPI tracking and basic variance analysis
- Maintain accurate documentation related to pricing and forecasting activities
